Centaurium Aviation orders a new Bell 407GX_i helicopter

Cologne, 20 November 2025

Centaurium Aviation Ltd., the independent representative of Bell Textron in Switzerland, signed a purchase agreement for a new Bell 407GX_i helicopter at European Rotors 2025.

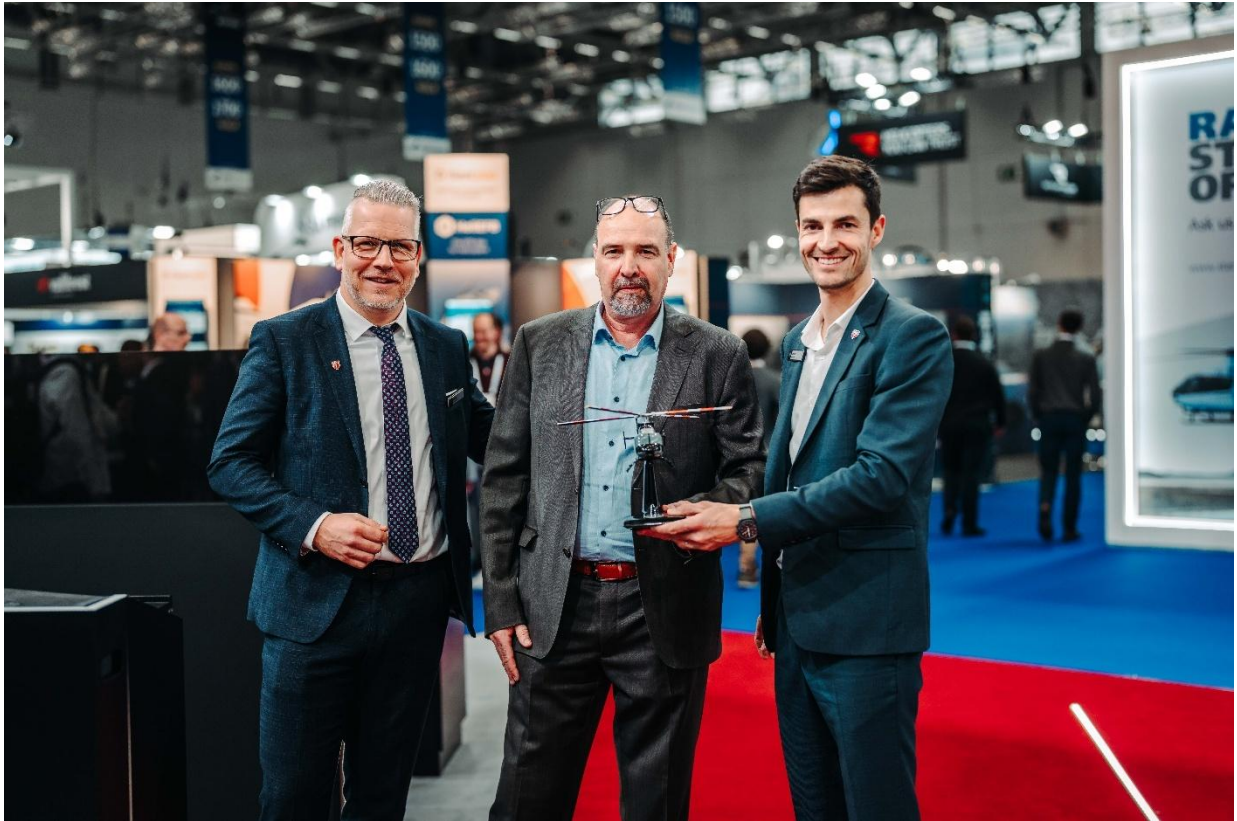

The helicopter will initially be used as a demonstration platform for customer presentations and will also be offered for sale.

The Bell 407GX_i continues to gain strong traction in the European market, particularly among VIP and corporate operators seeking a balance of comfort, performance, and safety. Featuring the Garmin G1000H NX_i integrated avionics suite, a FADEC-equipped Rolls-Royce M250-C47E/4 turbine engine, and a smooth, quiet cabin environment, the 407GX_i delivers exceptional reliability and mission flexibility.

“We are seeing a growing level of interest in the Bell 407GX_i across Switzerland this year, particularly from private and corporate customers who value its performance and refined comfort,” said Ivan Schmidhalter, CEO Centaurium Aviation Ltd.

“We are delighted to strengthen our partnership with Centaurium and appreciate their continued trust in Bell’s products and support,” said Daniel Högemann, Regional Sales Manager, Bell Textron.

The collaboration between Bell Textron and Centaurium Aviation Ltd. underscores a shared commitment to offering high-quality rotorcraft solutions tailored to the needs of discerning customers in Switzerland.
